

Advanced Searching for Knowledge Synthesis Projects

Mac-CARE and the Health Sciences Library
Faculty Development Education Series

Monday,
April 4th, 2022

12 PM – 2 PM | Zoom

About this workshop

Go beyond the “Essential Searching Skills” workshop by learning more advanced systematic search methods to apply to knowledge synthesis projects. Attendees will learn what is involved in knowledge synthesis projects, advanced searching skills, and will learn about managing citations and screening.

Learning Objectives

By the end of the session, you will be able to:

- Take your idea and put it into a searchable question
- Find articles more efficiently
- Select the best resource to answer your question
- Design and execute a systematic search strategy
