

Understanding Research Impact

Mac-CARE and the Health Sciences Library
Faculty Development Education Series

Monday,
April 11th, 2022

12 PM – 1 PM | Zoom

About this workshop

The ability to critically evaluate the impact of a piece of research is a crucial skill in today's global research landscape. McMaster Libraries offer a wide variety of tools that can help. Whether you are identifying key publications for a literature review, targeting high-impact journals for publication, or tracking the influence of your own research over time, this workshop will give you the skills and resources necessary for success.

Learning Objectives

By the end of the session, you will be able to:

- Discover high-impact research and track the developments of a subject area over time
- Critically engage with a variety of research impact indicators (e.g. Journal Impact Factor, h-Index, Normalized Citation Count, Altmetrics)
- Evaluate your own research impact and identify benchmarks for continued success
